DATE MAILED: 10/02/01

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner of Patents and Trademarks

Office Action Summary	Application No.	Applicant(s)	
	09/605,293	CHAPEK, DAVID L.	
	Examiner	Art Unit	
	N. Drew Richards	2815	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *28 June 2000* .

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *9-12 and 14* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *9-12 and 14* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11)☐ The proposed drawing correction filed on _____ is: a)☐ approved b)☐ disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12)☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

13)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☐ All b)☐ Some * c)☐ None of:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____ .

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

14)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) ☐ The translation of the foreign language provisional application has been received.

15)☒ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 3 .
4) ☐ Interview Summary (PTO-413) Paper No(s). _____ .
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: .

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 9 is rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art.

Applicant's admitted prior art discloses on page 1 lines 12-16 a semiconductor substrate, a layer of silicon dioxide on the substrate, and a layer of polycrystalline silicon formed on the silicon dioxide, the polycrystalline silicon having a smooth morphology. The admitted prior art discloses the layer of silicon dioxide having been doped with hydrogen ions. The semiconductor substrate is considered as a bottom portion of the silicon dioxide layer with the remaining silicon dioxide layer as the silicon dioxide layer upon the substrate. The limitation of the hydrogen ions deposited by a plasma source ion implantation process is a product-by-process limitation. The process by which the hydrogen ions are introduced into the silicon dioxide layer is not structurally limiting and thus the product-by-process limitation is given no patentable weight.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to

a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burns et al. (Principles of Electronic Circuits, Pp. 177, 380 and 381) in view of Applicant's admitted prior art.

Burns et al. teach a field effect transistor in figure 5.21 on page 177. Burns et al. teach a substrate, silicon dioxide layer, a layer of polycrystalline silicon over the silicon dioxide layer forming a gate, a source and a drain in the substrate. Burns et al. do not teach the layer of silicon dioxide having hydrogen ions implanted therein. Applicant's admitted prior art teaches implanting hydrogen ions into silicon dioxide. The limitation of the hydrogen ions deposited by a plasma source ion implantation process is a product-by-process limitation. The process by which the hydrogen ions are introduced into the silicon dioxide layer is not structurally limiting and thus the product-by-process limitation is given no patentable weight.

With regard to claim 11, Burns et al. teach on pages 380 and 381, a memory array which further includes a plurality of memory cells arranged in rows and columns comprising at least one field effect transistor having a gate source and drain formed on the substrate.

With regard to claim 12, Official Notice is taken that one of ordinary skill in the art at the time of the invention would form the transistor of claim 10 or the memory array of claim 11 on a semiconductor wafer including a plurality of die. This is well known as in semiconductor processing multiple devices are formed on a single wafer then split into individual die to allow for processing of a great number of die at one time to save of processing costs.

Burns et al. and Applicant's admitted prior art are combinable because they are from the same field of endeavor. At the time of the invention it would have been obvious to a person of ordinary skill in the art to implant hydrogen ions into the silicon dioxide layer. The motivation for doing so is to prepare the surface of the silicon dioxide for the deposition of a layer of polycrystalline silicon to provide for a thinner and smoother polycrystalline silicon film. Therefore, it would have been obvious to combine Burns et al. with Applicant's admitted prior art to obtain the invention of claims 10-12.

5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Murata et al. (U.S. Patent No. 5576229) in view of Applicant's admitted prior art.

Murata et al. teach a thin film transistor in figure 6E comprising a semiconductor substrate of glass, a layer of polycrystalline silicon 507 formed on a portion of the substrate, a insulating layer 503 formed on a portion of the polycrystalline silicon, a source region 507a and drain region 507b formed in the polycrystalline silicon, and a gate electrode 504 formed on the insulating layer. Murata et al. do not teach the substrate having hydrogen ions implanted therein. Applicant's admitted prior art teaches implanting hydrogen ions into a silicon dioxide (glass) layer to provide a smooth topology polycrystalline silicon film thereon. The limitation of the hydrogen ions deposited by a plasma source ion implantation process is a product-by-process limitation. The process by which the hydrogen ions are introduced into the silicon dioxide layer is not structurally limiting and thus the product-by-process limitation is given no patentable weight.

Murata et al. and Applicant's admitted prior art are combinable because they are from the same field of endeavor. At the time of the invention it would have been obvious to

a person of ordinary skill in the art to implant hydrogen ions into the glass substrate. The motivation for doing so is to prepare the surface of the glass substrate for the deposition of a layer of polycrystalline silicon to provide for a thinner and smoother polycrystalline silicon film. Therefore, it would have been obvious to combine Murata et al. with Applicant's admitted prior art to obtain the invention of claim 14.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Drew Richards whose telephone number is (703) 306-5946. The examiner can normally be reached on M-F 8:00-5:30; Every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Lee can be reached on (703) 308-1690. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
